

Cara Mengedit/Membuat Webtools

Created By : Ray Faldo

Contact :

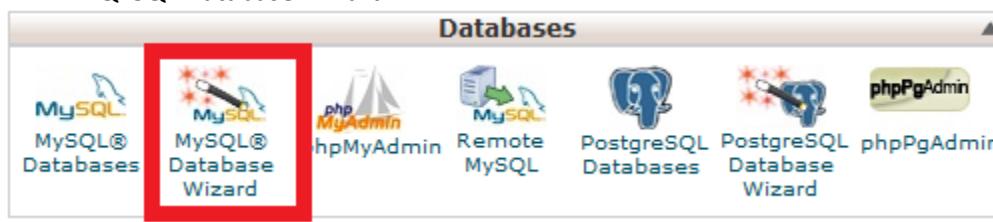

- Facebook : aldirayfaldoputra2
- Twitter : @rayfaldo_id

1.Pertama anda harus mempunya script webtoolsnya,kali ini versi Wholes.

2.Anda harus mempunyai cPanel pastinya :D

3.Oke,masuk ke cPanel

4.Klik MQYSQL Database Wizard

5.Masukkan nama database,bebas kok :D

MySQL® Database Wizard

MySQL Databases allow you to store lots of information in an easy to access manner. The databases themselves are not easily read by humans. MySQL databases are required by many web applications including some bulletin boards, content management systems, and others. To use a database, you'll need to create it. Only MySQL Users (different than mail or other users) that have privileges to access a database can read from or write to that database.

Step 1: Create A Database

New Database: anandawh_namadatabse

[Next Step](#)

6.Klik Next Step

Nanti akan begini :

MySQL® Database Wizard

Added the database **anandawh_namadatabse**.

Step 2: Create Database Users:

Username: anandawh_username **edatabase** ✓

Note: seven characters max

Password:

Password (Again):

Strength (why?): **Very Weak (0/100)**

[Password Generator](#)

[Create User](#)

[← Go Back](#) | [Go Back to the Main MySQL Page](#)

[Home](#) ▪ [Trademarks](#) ▪ [Help](#) ▪ [Documentation](#) ▪ [Contact](#) ▪ [Logout](#)

Nah masukkan username terserah anda,kalau bias,isi sama seperti nama database agar lebih mudah :D
Masukkan juga password...

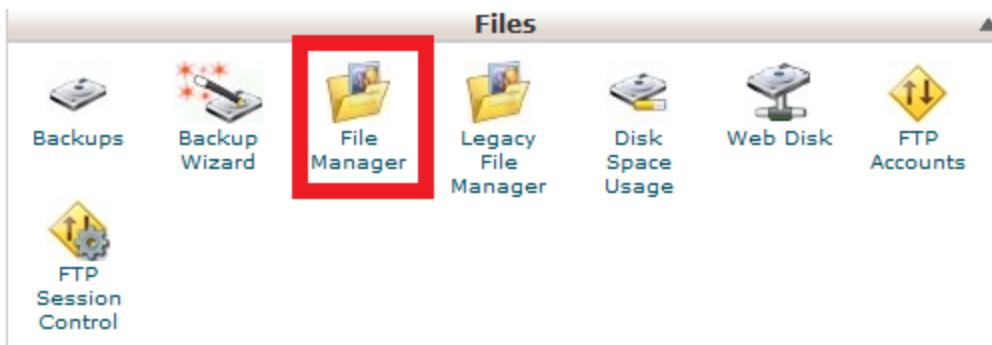

Nah kalau udah klik Create User :D

Centang semua gan :D

Jangan ada yang ketingalan,kalau udah nanti begini :

The screenshot shows the MySQL Database Wizard completed. The top banner features the cPanel logo and "cPanel VPS Optimized". The main content area displays the message: "User "anandawh_username" was added to the database "anandawh_namadatabse".". Below this, there are two links: "Add another database." and "Add another user for your MySQL database.". At the bottom, there is a "Return Home" link and a navigation bar with links to Home, Trademarks, Help, Documentation, Contact, and Logout.

Nah udah selesaai,skrg masuk ke file manager :D

Nanti muncul column,klik aja "GO".

Nah sekarang kita edit bagian filenya ^_^

Ikuti dulu langkah2 di bawah ini :D

Di dalam file,ada file **connect.php**,**koneksi.php** dan **dbconfig.php**

Nah,kita mulai dari file connect.php

Cari filenya :D

Name	Size	Last Modified (SE Asia)	Type	Perms
404.php	3.23 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
404.shtml	52 bytes	Nov 14, 2013 10:23 PM	text/html	0644
_vti_inf.html	1.71 KB	Nov 28, 2013 9:05 AM	text/html	0644
cafeland.php	4.28 KB	Dec 21, 2013 11:36 PM	application/x-httpd-php	0644
cek.php	871 bytes	Dec 2, 2013 10:18 PM	application/x-httpd-php	0644
channel.html	259 bytes	Oct 15, 2013 9:31 PM	text/html	0644
chatbox.php	2.42 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
connect.php	194 bytes	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dbconfig.php	387 bytes	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dc2.php	2.4 KB	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dcegg.php	1.28 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dceggss.php	1.71 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644
dcfood.php	575 bytes	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dcgems.php	2.38 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644
dcgld.php	7.14 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dcgold.php	1.87 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644

Klik "Edit" Dibagian atas,nanti akan terbuka di window baru :D

```

Editing: /home/penjokis/public_html/connect.php Encoding: utf-8 Re-open
<?php
$host = "localhost";
$user = "userdb";
$pass = "passdb";
$db = "namadb";
$konek = mysql_connect($host, $user, $pass) or die ('Koneksi Gagal! ');
mysql_select_db($db);
?>

```

Nah ntar begitu,edit sesuai user database,password database,dan nama database yang kalian buat tadi,ngerti ? :v

Yang gini lho gan -_-

The screenshot shows the cPanel VPS Optimized interface. At the top, there's a banner with the cPanel logo and "cPanel VPS Optimized". Below it, the title "CPANEL 11" is visible. The main content area is titled "MySQL® Database Wizard" and specifically "Step 4: Complete the task". It displays the message: "User "anandawh_usernam" was added to the database "anandawh_namadatabase".". Below this, there are two links: "Add another database." and "Add another user for your MySQL database.". At the bottom of the page, there's a "Return Home" link. The footer contains links for "Home", "Trademarks", "Help", "Documentation", "Contact", and "Logout".

Nah lu sesuain deh >_<
Isi sesuai database yang ente buat tadi :D

Nah sekarang DB Config :

The screenshot shows the File Manager interface. The left sidebar shows a tree view of the directory structure: /home/penjokis/cpanel3-skel/etc/mail/public_ftp/public_html/tmp/www. The right pane shows a list of files in the public_html directory. The files listed are:

Name	Size	Last Modified	Type	Perms
_vti_inf.html	1.71 KB	Nov 28, 2013 9:05 AM	text/html	0644
cafeland.php	4.28 KB	Dec 21, 2013 11:36 PM	application/x-httpd-php	0644
cek.php	871 bytes	Dec 2, 2013 10:18 PM	application/x-httpd-php	0644
channel.html	259 bytes	Oct 15, 2013 9:31 PM	text/html	0644
chatbox.php	2.42 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
connect.php	194 bytes	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dbconfig.php	387 bytes	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dc2.php	2.4 KB	Dec 21, 2013 11:37 PM	application/x-httpd-php	0644
dcegg.php	1.28 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dceggs.php	1.71 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644
dcfood.php	575 bytes	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dcgems.php	2.38 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644
dcgld.php	7.14 KB	Dec 3, 2013 7:23 PM	application/x-httpd-php	0644
dcgold.php	1.87 KB	Dec 21, 2013 11:38 PM	application/x-httpd-php	0644
dclisland.php	2.01 KB	Dec 21, 2013 11:39 PM	application/x-httpd-php	0644
dcspecial.php	1.66 KB	Dec 21, 2013 11:39 PM	application/x-httpd-php	0644
dcnesial.nhn	2.04 KB	Dec 21, 2013 11:39 PM	application/x-httnet-nhn	0644

Klik edit lagi :D

```
Editing: /home/penjokis/public_html/dbconfig.php Encoding: utf-8 Re-open
<?php
define('DB_SERVER', 'localhost');
define('DB_USERNAME', 'penjokis_user'); // DB username
define('DB_PASSWORD', '0000'); // DB password
define('DB_DATABASE', 'penjokis_user'); // DB name
$connection = mysql_connect(DB_SERVER, DB_USERNAME, DB_PASSWORD) or die( "Unable to connect");
$dbase = mysql_select_db(DB_DATABASE) or die( "Unable to select database");
?>
```

Nah,edit lagi sesuai database kalian tadi :D

Bisa kan ? :D

Nah,begitu juga dengan file koneksi.php

Semuanya di samain...

Ingat !

Connect.php,dbconfig.php dan koneksi.php semua diisi sesuai database yang kalian buat tadi -_-

Nah,sampai disitu udah ngerti kan ? :D

Mari kita lanjutkan di file yang lainnya D:

Nah sekarang,di setiap file itu pasti ada kode seperti ini :

```
$conn = mysql_connect("localhost", "penjokis_user", "0000") or die(mysql_error());
mysql_select_db('penjokis_user', $conn) or die(mysql_error());
$stanggal = date_default_timezone_set('Asia/Jakarta');
```

Contohnya di file index.php

```
Editing: /home/penjokis/public_html/index.php Encoding: utf-8 Re-open Use code editor. Click to edit
<?php
include_once "fbaccess.php";

$conn = mysql_connect("localhost", "penjokis_user", "rayfalido123") or die(mysql_error());
mysql_select_db('penjokis_user', $conn) or die(mysql_error());
$stanggal = date_default_timezone_set('Asia/Jakarta');

if(!$user) {
print('<script> top.location.href=' . $loginUrl . '</script>');
} else {
$fbid = $user_info['id'];
$nama = $user_info['name'];
$email = $user_info['email'];

$query = mysql_query("SELECT * FROM user WHERE fbid = '$fbid'");
$jumlah = mysql_num_rows($query);
$hasil = mysql_fetch_array($query);
$date = date('Y-m-d');
$tgl = strtotime( '-1 day' , strtotime( $date ) );
?>
<?php if($user) {
if ($fbid == 100007074485487) { ?>
FB ID ente di block oleh pihak Penjoki Serius
<? } else {
if($jumlah == 0) { ?>
<html>
<head>
<title>Penjoki Serius</title>
</head>
<body>
<h1>Penjoki Serius</h1>
<p>Anda belum mengikuti kami di Facebook!</p>
<p>Silakan ikuti kami di Facebook untuk mendapatkan informasi terbaru dan eksklusif!</p>
<p><a href="https://www.facebook.com/penjokiserius">Ikuti di Facebook</a></p>
</body>
</html>
?>
} else {
$hasil = mysql_fetch_array($query);
$jumlah = mysql_num_rows($query);
}
}
}
?>
<?php if($user) {
if ($fbid == 100007074485487) { ?>
FB ID ente di block oleh pihak Penjoki Serius
<? } else {
if($jumlah == 0) { ?>
<html>
<head>
<title>Penjoki Serius</title>
</head>
<body>
<h1>Penjoki Serius</h1>
<p>Anda belum mengikuti kami di Facebook!</p>
<p>Silakan ikuti kami di Facebook untuk mendapatkan informasi terbaru dan eksklusif!</p>
<p><a href="https://www.facebook.com/penjokiserius">Ikuti di Facebook</a></p>
</body>
</html>
?>
} else {
$hasil = mysql_fetch_array($query);
$jumlah = mysql_num_rows($query);
}
}
}
?>
```

Nah begitu,rata-rata,semua file berisi kode seperti itu di atasnya,ada file yang tidak menggunakan kode itu,jadi bila tidak menggunakan kode itu ABAIKAN saja.

Tapi bila di file itu ada kode seperti itu, anda harus mengeditnya sesuai database anda ^_^
Ngerti ?

Contoh Database yang nte buat :

The screenshot shows the cPanel interface for managing MySQL databases. At the top, there's a banner for 'cPanel VPS Optimized'. Below it, the MySQL Database Wizard is displayed, specifically Step 4: Complete the task. A success message states: 'User "anandawh_usernam" was added to the database "anandawh_namadatabse".' There are two links below this message: 'Add another database.' and 'Add another user for your MySQL database.' At the bottom of the wizard, there's a 'Return Home' link. The footer of the page includes links for Home, Trademarks, Help, Documentation, Contact, and Logout.

Nah jadi di code :

```
$conn = mysql_connect("localhost", "penjokis_user", "0000") or die(mysql_error());
mysql_select_db('penjokis_user', $conn) or die(mysql_error());
$Tanggal = date_default_timezone_set('Asia/Jakarta');
```

Edit jadi :

```
$conn = mysql_connect("localhost", "anandawh", "passworddatabase") or die(mysql_error());
mysql_select_db('anandawh', $conn) or die(mysql_error());
$Tanggal = date_default_timezone_set('Asia/Jakarta');
```

Nah sudah mengerti ?

Jadi anda hanya tinggal mengganti seluruh code di file

```
$conn = mysql_connect("localhost", "penjokis_user", "0000") or die(mysql_error());
mysql_select_db('penjokis_user', $conn) or die(mysql_error());
$Tanggal = date_default_timezone_set('Asia/Jakarta');
```

Menjadi sesuai database anda , contoh :

```
$conn = mysql_connect("localhost", "anandawh", "passworddatabase") or die(mysql_error());
mysql_select_db('anandawh', $conn) or die(mysql_error());
$Tanggal = date_default_timezone_set('Asia/Jakarta');
```

Jadi, anda edit 1 per 1 file, cari kode seperti di atas, lalu edit sesuai DB kalian ^_^

Nah, untuk masalah koneksi udah kelar :D
Sekarang tinggal masalah APPS Facebook :D
Oke, ikutin langkah2 di bawah ini D:

Buka link ini :

https://developers.facebook.com/apps?ref=bookmarks&count=0&fb_source=bookmark_apps&fb_bmpos=3_0

Klik buat Aplikasi Baru :D

Create New App

Nama Aplikasi: [?]	Joki Haus	Valid
App Namespace: [?]	Opsional	Failed [?]
App Category: [?]	Aplikasi untuk Halaman	Pilih Subkategori: [?]

By proceeding, you agree to the [Kebijakan Platform Facebook](#)

Lanjutkan **Batal**

Nah ntar gitu, isi sesuai yang kalian inginkan, lalu klik lanjutkan :D
ISI SESUAI SEPERTI INI :

Aplikasi ▶ Joki Haus ▶ Basic

 **Joki Haus**
App ID: 206775236176654
App Secret: 8c895c90bab44427139660821c769c2c (setel ulang)
This app is live (Visible to all users)

Informasi Umum

Display Name: [?]
Namespace: [?]
Contact Email: [?]
App Domains: [?]
Sandbox Mode: [?] Aktif Nonaktif

Pilih cara aplikasi Anda terintegrasi dengan Facebook

Website with Facebook Login
URL Situs: [?]

App on Facebook
Canvas URL: [?]
Secure Canvas URL: [?]
Canvas Width: [?] Cairan Tetap (760px)
Canvas Height: [?] Cairan Tepat pada px
Unity Integration Enabled: [?] Nonaktif Diaktifkan

Mobile Web
Mobile Site URL: [?]
Accept Mobile Web Payments: [?] Aktif Nonaktif
If your app accepts payments through any non-iOS approved service it will be restricted on iOS.
Pelajari selengkapnya.

Harus diisi sesuai domain kalian :D

Udah ?

Sekarang masuk lagi di file manager :D

listmember.php	4.42 KB	Dec 22, 2013 12:32 AM	application/x-httpd-php	0644																																																																																						

Itu semua harus di edit gan :D

Cara mengedit :

Pilih fbconfig.php

Lalu klik edit di bagian atas :3

Lihat :

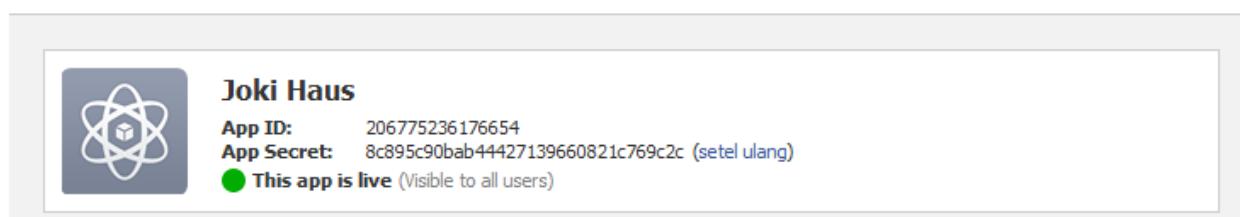

```
Editing: /home/penjokis/public_html/fbconfig.php Encoding: utf-8 Re-open Use code editor. Close
<?php
require 'src/facebook.php'; // Include facebook SDK file
//require 'functions.php'; // Include functions
$facebook = new Facebook(array(
    'appId' => '1435670066649577', // Facebook App ID
    'secret' => 'f47cid958600929f2df2ebc97ffd1769', // Facebook App Secret
    'cookie' => true,
));
$user = $facebook->getUser();
if ($user) {
    try {

```

Nah,"appid" dan secret diisi sesuai apps fb yang kalian buat tadi :D

Contoh :

Aplikasi ▶ Joki Haus ▶ Basic

Nah,APP ID dan APP Secret itu lah diganti :D

Jadi seperti ini :

```
'appId' => 206775236176654, // Facebook App ID
'secret' => 8c895c90bab44427139660821c769c2c, // Facebook App Secret
'cookie' => true,
```

Sesuai APPS FB yg kalian buat :D

Nah,kalau udah,begitu juga seterusnya dgn file fbid.php dan fbacces.php :D

Sudah selesai gan :D ^_^

Kalau masalah DATABASE lain lagi gan :D
